DESIGN INTEGRATED ACCESSORY SERIES

TrimLineSeries™

TrimLineSeries features a contemporary minimalist design, manufactured with satin-finish type 304 stainless steel. The low-profile TrimLineSeries warm air hand dryer extends the Series and supports inclusive design for accessibility compliance. TrimLineSeries features 90° angles on all exterior and interior corners and openings. Flanges are concealed for additional design simplicity.

Flush-mounted,
rectangular doors
and openings.

TrimLineSeries
One Bank Street, United Kingdom

ClassicSeries™

A seamless flange is the visual trademark of ClassicSeries, our most comprehensive selection of washroom accessories. ClassicSeries accessories feature satin-finish type 304 stainless steel throughout, whilst being engineered for the economic demands of price-sensitive projects.

Classic beveled flanges, hemmed edges, piano hinges.

ConturaSeries™

ConturaSeries sets the bar for design integrity and quality. ConturaSeries towel dispensers feature the TowelMate™ paper saving system, which limits paper delivery to one towel at a time. This eliminates towel bunching and waste, saving 20% or more in paper towels, preserving the environment and lowering operating costs. ConturaSeries waste bins include LinerMate™ bin liner retainers, which provide a neat, flush appearance with no unsightly bag overhang. ConturaSeries is manufactured with satin-finish type 304 stainless steel.

Seamless monoform draws, flush locks, precise fit and finish.

SOAP DISPENSERS

What makes an effective soap dispenser specification?

The right soap dispenser should meet the needs of your building's unique traffic. It should save time and money for the building owner, while minimising consumables usage—all while providing durable, long-lasting functionality. In addition, they should not lock the building owner into lengthy and costly commitments to proprietary soap cartridges. Bobrick soap dispensers address these challenges with a range of automatic, manual, liquid and foam bulk soap options.

DESIGN

SUSTAINABLE

DURABLE

ECONOMICAL

HYGIENIC

FREEDOM

AUTOMATIC OR MANUAL?

Although the no-touch restroom is quickly becoming industry standard, automatic accessories are not a universal solution. Some projects may benefit from manual operation.

Automatic Operation

Benefits

- Enhances hygiene, reduces cross-contamination
- Controls soap usage with portion control
- Creates a seamless, modern experience

Ideal Applications

- Prestige or high-end buildings
- Low to medium traffic facilities
- Washrooms with other touch-free accessories, especially faucets

Manual Operation

Benefits

- No batteries or power source required
- Foam soap offers greater hand coverage, discouraging excessive usage
- More mounting options

Ideal Applications

- Buildings with limited janitorial staff or resources
- High-traffic facilities
- Projects with stringent capital budgets

B-828, B-8281 & B-824 SUREFLO® FOAM or LIQUID AUTOMATIC SOAP DISPENSER

Features & Benefits

- **Labor Savings:** Top filling saves labor; oversized fill port designed for economical bulk jug soap. No more under-counter servicing of screw-on cartridges.
- **Soap Savings:** Foam or Liquid bulk jug soap saves more than 80% compared to proprietary cartridges at locked-in prices; SureFlo ROI averages one year.
- **Design Continuity:** Polished chrome finish reflects design continuity with other restroom accessories compared to the plastic retrofit hodgepodge.
- **Reliable Operation:** Electronic activation system defines the “dispense zone,” eliminating hand waving and false dispensing. Adjustable portion control.
- **Responsible:** Five 800ml soap cartridges hold approximately the same amount as a one-gal. bulk jug, resulting in a 57% reduction of post-consumer waste.

B-828 or B-8281 SureFlo Foam Automatic, Counter-Mounted Soap Dispensers

B-824 SureFlo Liquid Automatic, Counter-Mounted Soap Dispenser

How Much Will You Save?

Estimates based on one dispenser, comparing bulk-fill SureFlo to under-counter proprietary cartridges.*

- Annual soap savings **82%**
- Post-consumer waste reduction **57%**

There are additional labor-saving factors such as top-filling compared to frequent under-counter cartridge changeovers. Plus, the time consuming convenience of bulk jug soap.

Based on 35 people per sink at 4 hand washes per day, equating to 112ml of soap per day or 29.5L per year per sink. Bulk soap approximate annual cost \$41.01.

Patented.

DESIGNER'S NOTE

SureFlo dispensers can be powered through an AC Adapter, supporting sustainable, economical operation. It requires no batteries, which ultimately end up in landfills.

MULTI-FEED SOAP DISPENSING SYSTEMS

SERVICE MULTIPLE DISPENSERS FROM SINGLE SOURCE

NEW

Automatic Liquid & Foam Soap Systems

B-820 Six liter top-fill reservoir feeds up to six B-820-248 foam or B-820-258 liquid dispensers

Features & Benefits

- **Engineered for Busy Restrooms:** Designed for heavy traffic restrooms. Serves up to 6 sinks with automatic soap dispensers.
- **Hygienic:** Automatic dispensing for touchless hand washing.
- **Easy Maintenance:** Counter-mounted 6-liter reservoir for convenient top filling.
- **Cost-Saving:** Uses bulk soap for significant cost savings of 80% or more over proprietary cartridges.

Fill Port Indicators

LED indicator on the fill port lets maintenance staff know when service is needed.

- Blinks green when soap level is below 25-30%.
- Stops blinking green and warning alarm sounds to signal to stop filling.
- If using the optional battery pack, blinks red when batteries are low.

SOAP DISPENSERS

B-822 Series
Manual Liquid Counter-Mounted Soap Dispensers

Top-filling, counter-mounted liquid soap dispensers for ease of maintenance and labour savings. Bright-polished, vandal-resistant locking cover and spout. High-impact resistant body and shank.

COMBINATION UNITS

Make the most of a limited footprint.

And how can you do so while still supporting your patrons' unique hand-drying and waste-disposal needs? Bobrick Combination Units offer flexibility in form and function, allowing patrons to fulfill various functions with one convenient unit. Recessed units make the most of limited space while supporting high-end design. Sustainable dispensing solutions economise paper towel usage, resulting in operating cost reduction and decreased maintenance expense. Durable construction means that you can rest assured that your specification will have a lasting impact.

DESIGN

SUSTAINABLE

DURABLE

INTERCHANGEABLE MODULES

Adapt To Hand-Drying Needs

A washroom may serve different patrons and traffic patterns over the course of the building's life cycle. This may require switching between different paper towel dispensing solutions.

Convertible series cabinets allow facility managers to change between folded, mechanical roll and automatic roll paper towel dispensers, without inconvenience or additional cost. Waste bin capacity can also be adjusted in the field without changing the cabinet.

Flexible Solutions

The following modules can be interchanged in **B-3974** (page 19), **B-3944** (page 18), **B-3961** (page 19) and their alternate models. Modules can also be used in many other manufacturers' similar cabinets.

TRIMLINE SERIES

3-IN-1 COMBINATION UNIT

B-38031

TrimLineSeries

3-in-1 Recessed Paper Towel Dispenser, Automatic Hand Dryer and Waste Bin

Reduces towel usage up to 20% with TowelMate built in. Sustainable 900-watt high-performance hand dryer for reduced energy consumption and waste. Flush TrimLine space-saving design and robust satin-finish stainless steel construction, complementing washrooms from Class-A offices to fine restaurants. Door has 90° return. Dispenses 600 multifold or 450 C-fold paper towels. Removable, leak-proof, 46.8L waste container. Meets reach range requirements for Australian DDA, UK Doc M, US ADA and similar standards. Minimalistic styling with single-door design. Available in 115V and 230V versions. **B-38030** similar to B-38031, but with 13.7L waste container. Patented.

	Unit B-38031	Unit B-38030	Wall Opening B-38031	Wall Opening B-38030
Width	396	396	362	362
Height	1448	1448	1412	1412
Recess	195	100	202	102

Features & Benefits

Reduces towel usage, energy use and waste while providing a fast, comfortable hand dry.

- **Economical:** Patented TowelMate dispenses a single towel at a time eliminating bunching, reducing usage by up to 20%.
- **Quiet & Efficient:** Operates quietly and provides a comfortable, complete hand-dry.
- **Sustainable:** Patrons reduce consumption and waste by combining a 900-watt high performance dual-air hand dryer and a single paper towel.
- **Compliant:** Paper dispenser, air outlets and waste disposal meet reach range requirements for Australian DDA, UK Doc M, US ADA and similar standards.
- **Durable:** Robust type 304 stainless steel hinges provide long life, vandal resistance and easy maintenance.

B-38033 TrimLineSeries

Recessed Paper Towel Dispenser/Automatic Hand Dryer/Waste Bin

Satin-finish stainless steel. Door has 90° return, conceals flange. Dispenses 450 C-fold, 600 multifold or 850 single-fold paper towels. Removable leak-proof, 12.5L waste container. Hand dryer: 220-240V AC, 7 Amp, 1500-1700 Watts, 50/60 Hz, Single Phase, VDE approved and CE marked. **815969** similar to B-38033, but unit is narrower and taller.

PAPER TOWEL DISPENSERS

Save paper. Save money. Save labour.

An inappropriate paper towel dispenser specification—and an effective specification—can affect a washroom's operating efficiency for years. Bobrick Paper Towel Dispensers and the TowelMate paper towel-saving accessory are engineered to provide building owners with greater control over paper towel consumption and purchasing options, all while reducing waste and minimising labour expense associated with refilling and maintaining dispensing units.

DESIGN

SUSTAINABLE

ECONOMICAL

FREEDOM

ROLL OR FOLD?

Roll Paper Towels

Benefits

- More sustainable than folded paper towels in most buildings
- Can feature adjustable towel pull lengths, shorter second pull lengths
- Stub roll utilisation feature provides complete consumable usage at less replacement time

Ideal Applications

- Buildings where sustainable operation is important
- High-traffic facilities
- Projects with stringent operating budgets

Folded Paper Towels

Benefits

- Can be dispensed one at a time with TowelMate accessory installed, reducing waste
- Faster dispensing of towels
- Dispensers may be concealed, countertop mounted or have minimal wall protrusion

Ideal Applications

- Washrooms where low-profile design is desired, but recessed roll dispensers are not viable
- Prestige buildings with low-to-medium traffic where a minimalistic design theme is preferred

PAPER TOWEL DISPENSERS

B-4262 ConturaSeries

Surface-Mounted Paper Towel Dispenser with TowelMate

Satin-finish stainless steel. Top of cabinet equipped with key lock. Secured to cabinet with a full-length stainless steel piano-hinge. Dispenses 400 C-fold or 525 multifold towels. Cabinet slots indicate refill time. Includes built-in TowelMate. Patented.

is also available.

Features & Benefits

- Converting from folded towels to roll towels saves 30 %
- Open-market non-proprietary purchasing provides freedom from locked-in contract prices
- Adjustable lengths and stub roll utilisation for zero waste
- Sustainable type 304 satin-finish, 50 %-75 % recycled post-industrial stainless steel
- Durable fabrication, hygienic operation, accessibility-compliant

Colour Indicator Lights

- Green: Ready to dispense
- Red: Contact maintenance
- Orange: Low batteries*

*3974-57 AC adapter eliminates battery requirement

Patented.

Review Interchangeable Module options on page 13. Additional AutoRoll Dispenser options available at bobrick.com.

HAND DRYERS

The right hand dryer specification supports your vision.

For decades, hand dryers have become known for excessive noise levels, high energy usage, slow dry times and institutional design. However, Bobrick's line of Hand Dryers offers contemporary options that can eliminate these challenges across a range of building types. Support a high-end aesthetic with distinguished, low-profile designs. Take advantage of low-wattage operation to reduce energy expense. Specify a quiet model consistent with the tranquil experience that patrons may expect. And if you so desire, achieve all of these benefits while eliminating paper towels and associated waste completely.

DESIGN

COMPLIANT

ECONOMICAL

SUSTAINABLE

BALANCING NOISE, ENERGY AND DESIGN

To ensure optimal use of hand dryers, it is essential to take a holistic approach to product selection. Before specifying a hand dryer, consider the following:

A **low-wattage** jet dryer can help mitigate the energy impact of hand dryers, especially in high-traffic environments.

Many hand dryers have an institutional aesthetic. **Low-profile stainless steel** units can elevate design.

Excess or unpleasant noise can negatively impact the patron experience. A hand dryer with a **low decibel (dBA) rating** can help ensure appropriate acoustics for your project.

Water splashing and puddles are common complaints associated with many hand dryers. A drying alcove can **catch and absorb water**, thereby reducing maintenance while improving safety and hygiene.

DESIGNER'S NOTE

Although green building standards, such as LEED and others throughout the world, are typically a primary focus of sustainability efforts, they do not address many operational issues. Approaching product selection from an operational standpoint can ensure authentic, long-term sustainability.

HAND DRYER INNOVATIONS

LOW-WATTAGE & LOW-PROFILE OPTIONS

B-3725 **TrimLineSeries**

Recessed Hand Dryer

Recessed automatic hand dryer featuring low-profile design and a 150mm deep drying alcove to capture dripping water to create a more hygienic washroom that eases janitorial load. Operates at 70 dBA sound level with a sustainable 1.0 KW power rating. Installs in a 100mm wall depth. Patented.

Unit

Width	300
Height	1390
Depth	50

B-7125 **InstaDry Hand Dryer**

Surface-mounted high-speed hand dryer with an energy consumption of only 200 watts, making it the most sustainable jet dryer on the market. The slim profile cover projects no more than 98mm from the finished face of wall to comply with accessible design guidelines. Touts a dry time of less than 12 seconds.

Unit

Width	319
Height	274
Depth	98

DESIGNER'S NOTE

While the highly sustainable InstaDry hand dryer is ideal for high-traffic applications, such as transportation centres and stadiums, the Recessed Hand Dryer may be more appropriate for prestige facilities where design, noise and hygiene are priorities.

B-7188
TerraDry™

Surface-Mounted Hand Dryer

Bright-polished chrome die-cast aluminium cover. Operates at a mere 70 dBA. Slim 100mm depth is compliant with accessibility standards.

B-1658 Series & B-2908 Series

Standard Size Tempered Glass Mirrors

Tempered mirrors are engineered for heavy-traffic, vandal-prone bathrooms in stadiums, outdoor recreation centres and low-supervision facilities such as parks and public toilets.

Tempered glass mirrors resist breakage and provide a measure of safety from broken glass, but differ in colour and reflective quality from standard glass mirrors. Bobrick uses the highest quality tempered glass mirrors. Modest distortion or heat-generated markings are normal in the tempered glass mirror manufacturing process. Therefore, Bobrick will not accept returns of tempered glass mirrors with random distortion or markings.

Special-Order Reflective Surfaces

Polished Stainless Steel, Tempered and Laminated Glass Mirrors resist breakage and provide a measure of safety from broken glass, but differ in colour and reflective quality from standard glass mirrors. Available on special order.

DESIGNER'S NOTES

- To specify mirrors, use Series Number desired followed by width, then height in inches.
- Framed mirrors are manufactured to overall dimensions and must be installed with width and height dimensions as ordered.
- For framed mirrors, provide minimum 25mm clearance at top and each side of mirror for mounting on wall hanger

DESIGNER'S NOTES

- Check with your local Bobrick distribution partner for regionally compliant products, including ADA, EN, DDA, Doc M and other standards.
- Clearance between wall and grab bar for B-6806 and B-5806 series is 38mm.
- Bar passes through flange and is heliarc welded to form single structural unit.
- Compliance with structural strength requirements: grab bars that provide 38mm clearance from the wall can support loads in excess of 408kg when properly installed.
- Mandrel bending process ensures uniform bar diameter around curves.
- All joints and supports are contour-cut and welded.
- Concealed anchors and fasteners available as an optional accessory.

204-2

Vinyl Shower Curtain

Opaque, matte white vinyl, 0.2mm thick, contains antibacterial and flame-retardant agents. Nickel-plated brass grommets along top. Bottom and sides are hemmed. Curtain 1067mm wide, 1829mm high. Requires 7 hooks, not included.

KOALA KARE PRODUCTS

THE RECOGNISED LEADER IN CHILDCARE ACCESSORIES

Koala Kare Products, the world's most recognised brand of Baby Changing Stations and commercial childcare products is a division of Bobrick. Highlighted by the KB300 Series of 18 new baby changing stations available in plastic, stainless steel, and black matte finishes with compliant horizontal and vertical orientations. Features include Microban® product protection in the bed surface that inhibits the growth of odor-causing bacteria. Each KB300 Series station also has an internal steel frame for superior strength and safety.

DESIGN

COMPLIANT

HYGIENIC

DESIGNER'S NOTES

- For enhanced hygiene, all KB300 Series stations are equipped with built-in dispensers for sanitary bed liners and the Koala Pouch™ that dispenses diaper disposal sacks.
- Most Koala Kare Baby Changing Station models comply with EN 12221-1/-2 European Standards, ANSI S117.1 Accessible and Usable Buildings and Facilities, ASTM F2285-22 Standard Consumer Safety Performance Specification for Diaper Changing Tables for Commercial Use, and ADA Accessibility Standards for height, reach, projection, operation when correctly installed.

KB310-SSRE

Horizontal Stainless Steel Recessed-Mounted Baby Changing Station

One-piece, deep-drawn, uniform grain stainless steel exterior. Moulded grey colour polypropylene changing surface. 1050 mm W x 665 mm H. Depth (closed) 69 mm Extension (open) 442 mm. Patented.

KB310-SSRE-MBLK Similar to KB310-SSRE, but with Matte Black finish. Patented.

KB310-SSWM Similar to KB310-SSRE, but surface mounted. Patented.

KB310-SSWM-MBLK Similar to KB310-SSWM, but surface mounted. Patented.

KB311-SSRE Vertical, Recessed-Mounted Baby Changing Station

One-piece, deep-drawn, uniform grain stainless steel exterior. Moulded grey colour polypropylene changing surface. 665 m W x 1050 mm H. Depth (closed) 69 mm Extension (open) 834 mm. Patented.

KB311-SSRE-MBLK Similar to KB311-SSRE, but with Matte Black finish. Patented.

KB311-SSWM Similar to KB311-SSRE, but surface mounted. Patented.

KB311-SSWM-MBLK Similar to KB311-SSWM, but with Matte Black finish. Patented.

DESIGNER'S NOTE

Vertical changing stations are an ideal solution for restrooms with limited wall space. Koala's KB301, KB301-SS, and KB311 offer EN and accessibility compliance in a variety of colors and finishes.

CHILDCARE ACCESSORIES

KB300

Horizontal, Wall-Mounted Baby Changing Station

Constructed of polypropylene and features an exterior ring for enhanced aesthetics. Unit 897 mm W, 528 mm H. Depth (closed) 102 mm. Extension (open) 539 mm. Patented.

WHY BOBRICK?

PORTFOLIO OF VALUES

What makes Bobrick an industry leader? A legacy of commitment to solving the challenges that matter most to architects, building owners, facility managers and patrons.

BOBRICK

Architects, developers and facility managers have selected Bobrick's performance-engineered washroom accessories with confidence for more than a century. As the market leader, we deliver building owner value through design excellence, compliance, sustainability and economical cost-in-use.

DESIGN

Three design-integrated series of accessories include ConturaSeries for prestige properties, TrimLineSeries for up-scale buildings and ClassicSeries for standard use and heavy-traffic projects. From Class A to education and healthcare, recessed and surface-mounted, we have your design.

DURABLE

Robust engineering and built-in maintainability are the standards for our products, providing long-lasting functionality. Reduced repair and replacement costs also deliver a positive impact on the operating budget.

HYGIENIC

Bobrick is at the forefront of the touch-free commercial restroom with automatic models to limit cross contamination. Our stainless products are easy to maintain and sanitise through regular cleaning. Microban™ Antimicrobial protection is a Koala™ baby changing station exclusive.

SUSTAINABLE

Accessories fabricated of 50% – 70% post-industrial stainless steel contribute toward LEED International certification. Soap and towel dispensers are engineered to reduce consumables, thereby reducing the operating footprint of a given building.

ECONOMICAL

Cost-in-use savings are also trademarks of Bobrick restroom accessories. Products are designed to control soap and paper towel usage, reduce labour and maintenance expense, and to be vandal-resistant. Savings calculators, available online, confirm the substantial savings and return on investment.

FREEDOM

Non-proprietary dispensing of universal paper towels and bulk soap help building owners escape the high prices of consumable contracts common to closed system products. This facilitates open-market procurement and the ability to take advantage of a large variety of soap and towel options.

COMPLIANT

Bobrick is committed to offering the support you need to satisfy EN, DDA, Doc M, ICC/ANSI and other compliance standards throughout the world. Accessories are engineered to meet the latest accessibility requirements, such as wall protrusion, mounting heights, reach and operation. Bobrick gladly provides detailed consultation on compliant product selection and installation.

THE BOBRICK ADVANTAGE: GLOBAL SPECIFICATIONS PROGRAM

Only Bobrick's global representatives can assist in global specifications and distribution fulfillment throughout the world.

HOW IT WORKS

Architectural Inception

Architects in major global centers work on large projects and specify Bobrick brands on overseas projects such as:

- Airports
- Five-Star Hotels
- Convention Centers
- Office Buildings
- Museums
- Shopping Malls
- Universities
- Hospitals

Bobrick can assist in writing and advising on appropriate specifications to meet the values you desire for your project.

Bobrick Engagement

Bobrick's global, regionally-based architectural representatives follow up on these global opportunities to assist in the specification and with distribution. Complex projects throughout the world can be managed by Bobrick's International team to ensure seamless fulfillment.

Our representatives can secure strong basis-of-design specifications and provide appropriate sourcing and fulfillment partners.
